

Low Profile Edger

300295 | 13" Low Profile Edger
300604 | 19" Low Profile Edger

The Low Profile Edger offers a solution to rapidly grind and polish edges and seamlessly feather those edges into the main floor area. The Low Profile Edger cuts within ¼" of walls and obstacles, and its 3½" height enables the operator to grind under counters and overhangs. This machine greatly reduces the time and labor required to finish edges and achieves the same quality and specification with the main floor area.

FEATURES
