

EnviroPro Series

300115	27" EnviroPro
300118	27" EnviroPro with Robin
300116	27" EnviroPro WB
300127	27" EnviroPro WB with Robin

The EnviroPro Series Burnishers are ideal for achieving optimum shine on concrete and other surfaces using black or diamond impregnated pads. The weighted EnviroPro increases floor temperature during burnishing to raise the gloss level, and its passive dust collection system traps and filters dust through a unique shroud design. This dust collection system also comes equipped with a 2" external vacuum port for heavier dust collection. The EnviroPro Series comes in the 27" deck with a Kawasaki or Robin engine and with or without a 15 pound deck weight.

FEATURES

- Weighted metal pad driver
- Infrared thermometer
- Available with weighted deck for additional head pressure
- Dust collection system
- STONEKOR ProCarb™ carburetor & E-Zero™ emissions shutdown
- Engine kill switch
- Exceeds EPA & CARB standards
- Aluminum tank
